

(Select nearest intersection south and west of point)

- Sample Point: KURE ISLAND
1. AH identifies basic 15° quadrangle
 2. BP identifies 1° quadrangle
 3. 40 identifies Georef minute of longitude
 4. 20 identifies Georef minute of latitude
 5. Sample reference: AHBPA4020

CAUTION: GEOREF "minute" values always increase eastward and northward from the southwest corner of each 1° quadrangle. Thus, in either West Longitudes or South Latitudes, GEOREF "minute" values (except 30) will be opposite from normal longitude and latitude minute values.
