We will be hosting a webinar with [Mr. Guy Ryder](#), UN Under-Secretary-General for Policy in charge of the "[Summit of the Future](#)" to be convened by UN Secretary-General Antonio Guterres this September. Today, as a global community, we face an range of interlinked challenges and even existential risks. The Sustainable Development Goals are off track, conflict and displacement are on the rise, inequality and poverty are tearing societies apart, developing countries are suffocated by debt, and the climate chaos is impacting the poorest the most. While new technologies, particularly artificial intelligence, hold enormous promises for people and planet and for advancing peace and prosperity, they also create new threats. These global crises demand international solutions through a more inclusive, networked and effective multilateralism reflecting the realities of today. Please join the conversation to discuss this once-in-a-generation opportunity to advance multilateral solutions for a better tomorrow.
